

Student,

Research shows that students lose Math concept knowledge without consistent practice/exposure. Summer work is vital to retain Math knowledge which alleviates gaps in learning.

To bridge these gaps, we are requiring all students to review concepts that will prepare them for learning in the fall. Additionally, each student must complete 2 concept tests. **These 2 tests will be the first two grades for the school year.** The tests can only be taken one time.

- **The first test will be available June 1 and MUST be completed by July 3 at 11:59 pm.**
- **The second test will be available July 6 and MUST be completed by August 7 at 11:59 pm.**

Students will have access to text book material and other resources in their Google Classroom. The Algebra Google Classroom can be accessed by the following code i6wtaj4 using your school or personal Gmail account. If your student does not have an SCC student account or a personal Gmail account one will need to be created to complete this work.

For questions regarding summer Math or access please contact Mrs. Synowicki.
